

CMPE 205 On-The-Job Training 1 (300 hours)

STUDENT’S WEEKLY REPORT ON ACTIVITIES

Name of Student: Karl Tristan F. Romero
Company Name: Jump Solutions Inc.
Company Address: 7th Flr Erechem Building Salcedo, cor V.A. Rufino St, Legazpi Village,
Makati City, 1229 Metro Manila
OJT Adviser/s: Engr. Marlon Jhon B. Bautista

WEEK 5 (JULY 27-31, 2026)

DAY	ACTIVITIES
July 27, 2026 (Monday)	• The networking implementation team tasked us to collectively produce five(5) pieces of five (5) meter LAN Cables • As part of the consultation process in our Ekahau AI Pro-produced network plans, our mistakes were pointed out: considerations in the amount of decibels (dB) produced by the Access Points (AP), height of APs, AP models, and an addition of AP to comply with the clients’ preferences.
July 28, 2026 (Tuesday)	• Continued to create the five (5) LAN cables • Deployed switch terminals via PuTTY • Configured VLANs and tested connections between our devices using a Cisco Catalyst 9300-24U and an Aruba switch using its native GUI • Troubleshoot the connection errors in the Cisco switch
July 29, 2026 (Wednesday)	• Attended an Audio-Visual (AV) meeting at Metro Pacific Health (MPH) • Started creating the Minutes of Meeting (MOM) for the AV meeting • Started on our weekly certification program with Fortinet Training Institute’s Cybersecurity and Cloud Fundamentals: Network Security Expert (NSE 1)
July 30, 2026 (Thursday)	• Finished the MOM for the AV meeting • Practiced switch configurations on Cisco Packet Tracer • Practiced setting up a firewall with Sophos
July 31, 2026 (Friday)	• Configured the firewall with Sophos • Performed a connectivity test between hosts that are connected via two (2) physical switches (Aruba and Cisco) that are trunked together.
